WHALING OFF NOVA SCOTIA, NEWFOUNDLAND AND GREENLAND IN THE EARLY EIGHTEENTH CENTURY BY NANTUCKET INDIANS.

ABSTRACT.

After 1712, Nantucket expanded her whaling activities off-shore with voyages in sloops of 25-50 tons. Each sloop was manned by 13 seamen, of which between 4 and 8 were Indians. This study of an account book documents the whale shares credited to 17 Indians by Nathaniel Starbuck, Jr., between 1721 and 1758, in some cases with the species, season and grounds at which a whale was caught. I also examine the credit history of these Indians and the structure of account book barter in a period when the economy was expanding and hard money in New England was limited.

INTRODUCTION.

Since whales of a number of species range seasonally off certain temperate coasts of the North Atlantic, and strand themselves or wash ashore dead on certain shores (Little and Andrews, 1982), coastal people may have always used whale oil, bone, tendons, and meat. However, between about 1536 and 1700, Spanish and French Basque whalers in shore-based boats hunted whales in the Strait of Belle Isle and Gulf of St. Lawrence, and processed the oil on shore for European markets. The Dutch, interested in Davis Strait and Labrador since 1614, began a major fishery there after 1700, with some English competition (Tuck 1981; Barkham 1984; Kupp and Hart 1976).

The growth of the American whaling industry was characterized by sequential discovery and exploitation of whales in areas where whales congregated at various seasons (Mitchell 1974). Commencing in 1690 with winter whaling from shore stations (Little 1981b), Nantucketers, according to sometimes discordant historians, sometime after 1712 ventured to sea in sloops carrying two whaleboats, in the spring, summer and fall. First to Nantucket Shoals, then in the "deep", they proceeded, not necessarily in the following order to exploit whales in the Gulf of St. Lawrence, Strait of Belle Isle, coast of Labrador, Davis Strait, Greenland (Cape Desolation, Disco), south of Virginia and east of the Newfoundland banks, the coast of Guinea (1763), the Western Isles (1765), Brazil and the Falkland Islands (1774), and by 1805 in the Pacific Ocean (Crevecoeur 1971:116; O. Macy 1835:54; Z. Macy 1792; Starbuck 1964; Stackpole 1953).

In 1935 C. W. Townsend (1935) studied the behavior of whales by using chiefly 19th century American whaling logs and plotting the location and season of capture of several species of whales. Well-defined seasonal right whaling grounds are shown in most temperate oceans of the world, but the North Atlantic, exploited in the eighteenth century, is blank, as few eighteenth century whaling journals survive. Recently, 32 nineteenth century North Atlantic right whales documented by Townsend have been mapped by Schevill and Moore (1983), who state in their paper, "because so little is known, the location and season of even Townsend's few North Atlantic right whales are important". Using recent

observations, whaling logbooks, journals, newspapers and other historic records, Schevill, Watkins and Moore (1987) have documented right whales near Cape Cod, and Reeves and Mitchell (1987a, 1987b) have published documentation for right whaling grounds at Long Island, Cape Farewell (Greenland), and Southeast US Coast (North Carolina to northern Florida). They identify Nantucket and Dartmouth whaling grounds of the second half of the eighteenth century east of the Grand Bank of Newfoundland, in the Strait of Belle Isle and along the Labrador coast. In this paper I document at least ninety nine whales credited to Nantucket Indians in a manuscript account book of the period 1721-1758.

Peter Folger reported in a journal of 1760 that he "Went over the Bar In Company with Stephen Paddack and Come to Anchor and waited for our Indians" (as reported in Fonda 1969:9). According to Obed Macy in 1835, the 13 man crews of the whaling sloops "were made up in part of Indians, there being usually from four to eight in each vessel. They were pleased with the business, and always ready to engage in it when called upon" (Macy 1835:38). In 1730, the 25 Nantucket sloops would have required 100 to 200 Indians, and Byers (1987:159) cites a mid-18th century report that the Indian population of Nantucket in 1746 increased to 900, many of whom were Vinyarders who had "gone to settle on Nantucket, being a place of better employment". Macy's view has been challenged by Daniel Vickers (1981, 1983:579,583; Byers 1987:99), who argues that the Nantucket English controlled Indian labor chiefly through the use of indebtedness. I examine accounting methods in Starbuck's and Hussey's account books and show that debits characterized the account book barter system, which was used also by the English.

"MARY STARBUCK'S ACCOUNT BOOK WITH THE INDIANS" (Starbuck 1662-1768).

A sheepskin covered manuscript account book at the Research Center of the Nantucket Historical Association has provided material for studies by Worth (1915), Little (1981a), Vickers (1981, 1983), Bragdon (1986) and Byers (1987). It is dense with data, with scratchouts, blots, and mistakes, and at least 23 missing pages from an original 147 pages. Although these hurdles create difficulty for the reader, Mary Starbuck's account book continues to repay study. All of the data pertaining to whaling are in the last period of the accounts, from 1721 to 1768, kept by Mary's son, Nathaniel Starbuck, Jr., until 1750 and then by someone who spelled 'share' as 'shear' (Worth 1915).

Credits in the account book consist of, among a wide range of items, sheepskins, fishing, carting, plowing, fetching wood, hoeing and hilling corn, mowing and cocking hay, shearing and washing sheep, winding wool, work (at one pound sterling a week [Starbuck 1662-1768: 125 (1739)]), threshing oats and barley, whale oyle and bone (baleen), whale shares, towing whales, fish, corn, oats, barley, wheat, beans, feathers, baskets and bills.

WHALES, SPECIES, SEASONS, GROUNDS.

For this paper I have transcribed all of the whale credits, a total of 198 entries, from Starbuck's Account Book (Table 1) for the seventeen Indian whalers. These data were then converted to a chronological list of credits to Indians for their whale shares (Table 2). The chronological ordering demonstrates that there were no more than 6 or 7 Indian accounts in any one year (Figure 1a). The places of those who died were taken by others. Chronological ordering (Table 2) also shows that sometimes a number of Indians had shares in the same whales and that some payments for the same whale extend over several years. A list of whales (Table 3) clearly distinguished by date, place, captain, species, etc.,
Figure 2. Western North Atlantic Whaling Grounds of early Eighteenth Century Nantucketers. The whaling grounds, circled, are estimated from place names in Starbuck's Account Book (1662-1768): A, "along-shore" at Nantucket; B, "bobel" (Bowbell); C, "ye deep"; D, "Cariliner"; E, "Canso"; F, "Newfoundland"; G, "Greenland". Base map after Schevill and Moore (1983:5).
conservatively contains 99 whales, the maximum number of whales identifiable with confidence. Further studies now underway will allow additional inferences.

Figure 1b and Figure 2 display the locations named for whale catches. Nantucketers since 1690 had been catching right whales along-shore during the winter. At least nine along-shore whales caught between 1726 and 1754 are identified. Staples' whale in 1726 may have been one of the 86 along-shore right whales previously documented for 1726 which was the peak year for along-shore whaling (Little 1981b; Macy 1835). An along-shore whale, assumed to have been a right whale, was often represented by both oil and bone (baleen) and identified by a boat captain, who was sometimes an Indian (Eben Smugg, Eb. Coduda, Jonathan Micah, Staples?). The season, when given, was winter.

By 1715 Nantucketers had begun using sloops of 25 tons and up to pursue right whales off shore, which initially meant the Nantucket Shoals, including Bowbell (Chamberlain 1964:92) where at least nine whales were caught between 1728 and 1747. In "ye deep", or off the continental shelf, ten whales are listed between 1729 and 1735. Here they could have been hunting sperm whales (which have "head matter" but no "bone") as well as baleen whales. Six sperm whales are identified (Table 3) from unknown grounds.

By 1734 the Nantucket Indians recorded by N. Starbuck, Jr., were catching whales during the summer near Canso, Nova Scotia (three recorded), by 1738 near Newfoundland or the Land (Baxter 1945:51) (five recorded), and one Greenland whale was recorded in 1737. Some Indians were paid for fish as well as for whales at Canso. From the use of place names, I assume that these grounds were in the vicinity of the land (Figure 2; Kupp and Hart 1976: Fig. 2).

In spite of the number of whales caught at unknown grounds, Starbuck's Account book documents whaling patterns between 1726 and 1746 which are poorly known at present. According to Obed Macy (1835:38), after whales became scarce near shore, whaling sloops began to go to the "southward" until July 1, after which, with a stop at Nantucket, they went to the eastward of the Grand Banks of Newfoundland. One "Cariliner" whale is specified in Starbuck's Account Book, but not until 1753, and only after 1753 are the grounds east of the Grand Banks documented (Fonda 1969). Starbuck's Account Book supports Crevecoeur's (1971:116) 1782 list of early Nantucket whaling and/or fishing grounds which includes the Cape Breton banks, Sable Island, Newfoundland and Cape Desolation. The whales caught at unspecified grounds suggest caution, but the data show regions worth further exploration for whaling records, even archaeological ones.

Probably, because of their value and ease of capture, most of the whales with oil and bone products in the accounts were right whales. However, north of 50° N, some Bowhead whales may have been caught. Bowheads resemble the right whale but have more oil and longer baleen than the right whale, and the term 'long' bone, which appears in the accounts as early as 1724, may indicate bowheads. Unfortunately, for what is called a "whale share" in the accounts, both the number and species is uncertain.

INDIAN ACCOUNTS.

"The Indians obtained very successful returns which they expended on English commodities on their arrival home" (Worth 1915:31). Indian accounts show purchases of: buttons, thread, yard goods such as cotton, calico, linen, silk, britches, shoes, a blanket, molasses, beef, rye, corn, salt, a testament book, a horse, saddle, calash, firewood, line,
hooks, flints, powder, shot, sturgeon iron, lance warp, candles, boards, bricks, nails, plowing, cash and bills. In order to spend their earnings these 17 men credited Nathaniel Starbuck, Jr., with their whale shares and other goods and labor. Starbuck, who was a blacksmith and trader, acted as their banker, credit manager, and store keeper. He accepted bills for their purchases at other stores, such as Sylvanus Hussey's (1724-1734:259), where he had credit.

This complex accounting system came about at that time because there was an acute shortage of money in the American colonies (Baxter 1945). Baxter (1945:17) calls it "bookkeeping barter". If you gave Starbuck your whale share, he needed to have a large range of inventory, or you used a form of triangular trade, evidence of which lies in the numerous debit and credit accounts with third parties. Examples include Japhet's debit of 22/8 to S. Hussey and Japhet's credit from Diamond for towing a whale (Starbuck 1662-1768:36,37). The bills, notes, and orders in the accounts are clearly substitutes for cash.

I checked many of these accounts on my pocket calculator, allowing 12 pence to the shilling and 20 shillings to the pound. Starbuck's accounts include mistakes in addition and subtraction. There are illegible corrections and strike outs. Reckonings are not always done in a timely fashion. Byers (1987:161) cites Paul Quaab's complaint that the accounts contain overcharges and misrepresentations of credits as charges. Such errors occur in these accounts but I can find no evidence that they were deliberate.

As some Indians were literate and most were expert in numerical games (Williams 1643: Chapter 4), many could have kept their own accounts. At least one account book kept by an Indian exists at the Nantucket Historical Association (Account Book #210) and there are enough references in Starbuck's Account Book to "a piece of paper" or "a little book" to suggest that Indian-kept account books were not uncommon (Starbuck 1662-1768:37). Examples of corrections in the Indians' favor are frequent in Starbuck's Account Book (1662-1768:123, 37, 9, 146, 145, for example) although errors still remain.

In auditing these accounts I have compared the prices charged the Indians for knives and pails with prices charged Englishmen in Sylvanus Hussey's Account Book (1724-1734). The prices of 11 knives in 1728-1729 ranged from 1/0 (one shilling, no pence) to 4/6. The average price paid by six Englishmen was 2/8 and by five Indians was 2/10. For six pails with a price range of 1/6 to 2/0, four English averaged 1/6 and two Indians averaged 1/10. These results suggest that Indians may have paid slightly more for goods at Starbuck's and Hussey's than Englishmen did, or that Indians preferred the better quality knives and pails. For stronger conclusions this study needs to be expanded. I would also like to know the retail price at Boston of the goods sold at Nantucket.

ACCOUNT BOOK DEBITS AND CREDITS

Starbuck's Account Book shows credits and debits for 17 Indians (Table 5). Tom Pony had an account at Starbuck's for 35 years, during which he earned and spent an average of 40 pounds sterling a year. Isaac Tashame had an average income of 73 pounds per year for 17 years. For comparison, Byers (1987:93,168) cites an annual income for a laborer on the mainland as 12-18 pounds per year (1726-1774), or one quarter that at Nantucket.

Table 5 shows that upon termination some accounts were transferred to another book, some were paid off by another trader, some, upon a man's death, were passed on to heirs, and some may have been cancelled as bad debts. The average final debt for 15 Indian
accounts at Starbuck's was -32 pounds sterling (range from +3 to -97) and for 8 Indians at Hussey's was -16 pounds sterling (range from +1 to -58). Furthermore, exactly the same system held for the Nantucket English in Hussey's Account Book (1724-1734), where 15 Englishmen's accounts taken at random show an average final debt of -120 pounds sterling (a range of from +16 to -491) (Table 6). In other words, the Nantucket English had four times more credit with Hussey than did the Indians with Starbuck or Hussey.

English and Indian credit accounts were based largely on mutual trust. That credits lead debits in time echoes native reciprocity (Morantz 1987). That the system occasionally broke down is shown by court records at Nantucket, which need to be consulted for individual Indians, charges and sentences, a potentially valuable study. Although prison, a jury and a coroner are mentioned in Starbuck's Account Book (Table 5), the only evidence for indentured service is indicated by the note that Tom Pony was "sett over" for service to Starbuck for 2 and 1/4 years by the Trustees of the town for 17 pounds in 1743. The financial penalty for Pony's indenture was a 2 and 1/4 year lack of income, during which he continued to rely on Starbuck for credit. The uniqueness of this entry is notable. Ten Indian whale shares credited to Edward Allen (Hussey 1724-1734:233, 265) without corresponding evidence of Indian purchases are suggestive but not unequivocal evidence for indentures. Other than these rare instances, account books show Indians spending the money they earned.

CONCLUSIONS.

There are substantial gaps in our knowledge of eighteenth century whaling. I report here on a study of the 17 Indian accounts between 1721 and 1768 in Starbuck's Account Book with the Indians (1662-1768), which provides data on 99 whales, seasons and species in an early period of western North Atlantic whaling. These data document the earliest pelagic whaling by American whalemen (Table 6) including American Indians, and indicate whaling grounds and their changes with time.

Evidence for some exploitation of some Indians exists (see Little 1981; Byers 1987; Vickers 1983; Starbuck 1924). As Roger Williams wrote in 1643, "The Natives are of two sorts, (as the English are) (Williams 1973:93)," which is probably a true statement which ever way one says it. However, account books available at Nantucket do not contain evidence for claims that most of the Nantucket Indian whalers were indebted servants obliged to return their earnings to their masters.

The accounts show that between 1721 and 1756 some Nantucket Indian whalers earned up to four times the annual wages of a Boston seaman. Indeed, in 1726, Tom Bon (Poney?) was paying freight on his "England Goods" (Hussey 1724-1734:58). The development of the island of a system of credit which included the Indians helped provide for the remarkable growth of the whaling economy of Nantucket (Baxter 1945:17; Shepherd et al., 1972). That some Indians participated successfully in the developing economy of New England, fueled in large part by oil exports to Europe, deserves recognition (Thomas 1985:157) and additional study.

ACKNOWLEDGEMENTS. I should like to thank Edouard A. Stackpole, Helen W. Chase, J. Clinton Andrews, and William Schevill for discussions, and Louise R. Hussey, librarian, Jacqueline Haring, curator of Research Materials, and her assistant, Gayl Michael, for assistance in using the manuscript collections at the Nantucket Historical Association.

Joe Towaddy: 11 mo whale share with S: Folger at bobel this Summer: 63.11.4

Tom Poney: By a share caught with G:H this fall: 10.02.02

1743 John Tashame: 11 mo Share Caught with Shubael Folger 69.9.3
& Isaac ye Same: 69.9.3
John Tashame Jr: By oyle caught with S. Folger in ye Spring 1743: 30.7.6
Tom Poney: By a share with ye Hannah 00.00.00
Josiah: By what he got ye trip before he was lost is 28/3: 1.8.3

John Tashame Jr: 1 mo By his Newfoundland voyage with S:H: 52.17.4
John Tashame Jr: 11 mo whale with Jonathan Coffin Jr. ye boon 72/2: 3.12.2

1744 Isaac Tashame: By his share caught with Shubael Folger at Bowbel: 48.14.3

1745 Tom Poney: a whale share with Shubael Folger this summer past
Tom Poney: a whale share with Shubael Folger: 40.3.2
Isaac Tashame: a whale share with Shubael Folger: 39.8.1

1746 Tom Poney: a whale share with Edward Starbuck: 30.00.09
Isaac Tashame: a whale share with Edward Starbuck: 39.3.4

1747 Isaac Tashame: a whale share with Edward Starbuck at bobells: 52.09.9
Tom Poney: a whale share with Edward Starbuck: 55.00.05

Tom Poney: By thy Newfoundland voyage with S. H[ussey]: 5.00.00.
(1748) Tom Poney: By more of his Newfoundland voyage with S. H[ussey]: 7.00.00

1748 Isaac Tashame: a whale share with Edward Starbuck: 47.15.8
Tom Poney: 7 mo a whale share with Edward Starbuck: 47.15.8

1749 Isaac Tashame: a whale share with Edward Starbuck: 122.9.8
Tom Poney: a whale share with Edward Starbuck Last Spring: 122.09.08

1750 Tom Poney: a half share with Edward Starbuck Last Spring: 50.05.00
Isaac Tashame: a half share with Edward Starbuck: 50.5.0
Tom Poney: By his Sheare of head matter that went to Felladelfa: 4.16.6
Isaac Tashame: By his Sheare of Head matter went to Felladelfa: 4.16.6

Isaac Tashame: 10 mo a half Share with Jonathan Coleman last winter: 5.14.6

Tom Poney: a share with Francis Swain one trip: 8.11.6

1751 Isaac Tashame: a share with Edward Starbuck: 31.3.6
Tom Poney: a share with Edward Starbuck: 31.3.6
1752 Tom Poney: a share with Peter Coffin one trip: 0.19.04

1753 Isaac Tashame: a share with Edward Starbuck: 3.17.8
Tom Poney: a 1/2 shear with Edward Starbuck: 3.03.09
Edmund Jones (negro): a half share with Edward Starbuck: 15.3.5
Edmund Jones: Cariliner Bone 2 pound 1/2: 2.6.6
Edmund Jones: By one pound & a half of Short Bone: 1.13.9

1754 Tom Poney: a share with Edward Starbuck last Spring: 2.02.06
Isaac Tashame: a share with Edward Starbuck Last Spring: 3.13.5
Tom Poney: a share with T. Masy at the land: 5.7.7
Isaac Tashame: 2m 2 pounds & 3 ounces of Bone with Eb. Coduda: 0.5.8

1755 Isaac Tashame: 7 mo a share with Abisha Barnard: 26.18.11
Tom Poney: a half share with Shubal Pinckham: 96.02.07
(1757) Tom Poney: By a omission of his half shear with Shubal Pinckham: 2.13.01
(1757) Tom Poney: a share of whalebone with Shubal Pinckham: 4.4.9
(1757) Joe Towaddy: a half share with Shubal Pinckham: 98.15.7
(1757) Joe Towaddy: By Walle Boone with Shubal Pinckham: 4.4.4
(1757) Isaac Tashame: a share of bone with Shubael Pinckham: 4.4.4
(1757) Isaac Tashame: a share with Shubal Pinckham: 18.15.6

Tom Poney: a half share with Jeams Coffin: 96.15.00
Joe Towaddy: a share with Tristram Swain: 74.10.2 (Old tenor)

Edmund Jones: a share with Benjamin Buncker: 1.13.9

1756 (1757) Tom Poney: By his share with Benjamin Buncker last Spring: 75.11.7
(1757) Isaac Tashame: a share with Benjamin Buncker: 75.11.7

1757 Isaac Tashame: By 10 pound Long Boon Caught with Job Moers last winter: 10.0.0
Isaac Tashame: a share with Jonathan Mory: 8.13.9

1758 Tom Poney: a share with Benjamin Barny: 27.15.00

[Note: money value changes during this period; calendar also changes: in the first half of the 18th century the first day of the year is about March 25, and March is first month]
### TABLE 3. CHRONOLOGICAL LIST OF THE MAXIMUM NUMBER OF WHALES CAUGHT BY INDIANS IN STARBUCK'S ACCOUNT BOOK (1683-1768).

I have collapsed account entries into as few whales as consistent with the data, so there may be more than one whale involved in a given entry. Indian names in parentheses are given in full only upon their first appearance. Some spelling has been standardized.

1744 -218.6.6 + 149.19.7 = -68.6.2
1744 paid jury and coroner, carried to p. 113, son Isaac Tashame's account
1745 John Tashame, Jr, credited to brother Isaac's acct: 43.7.8

JOHN TASHAME, JR (122)
1742 -23.17.8 + 59.6.8 = +35.9.10
1743 -105.4.5 + 96.14.3 = - 8.10.0
1743 -75.13.10 + 84.0.6 = + 8.6.8
1744 -54.18.10 + 8.6.8 + 43 cash = + 3.12.2

ISAAC TASHAME (120, 113, 106, 110, 111)
1742 + John + 136.3.11 = -31.0.8
1743 + John -218.6.0 + 149.18.7 = -70.5.1 + 43 credit of John Jr
1744 -110.6.8 + 94.3.3 = -16.10.5
1745 -82.7.7 + 46.15.10 = -35.11.9
1746 -57.5.5 + 40.4.10 = -17.10.25
1747 -101.3.10 + 54.12.9 = -49.14.3
1748 -121.5.11 + 55.18.5 = -65.7.6
1749 -200.1.6 + 124.0.10 = -76.0.8
"to sundries at Silvanus Hussey's shop"
1750 -51 -197.8.2 + 102.12.1 = -94.16.1
1752 -173.12.6 + 173.12.6 = -10.2.9
1753 -54 -13.11.10 + 4.11.5 = -9.0.5
1755 -56
1756 -57 -224.13.10 + 262.4.7 = +37.10.9
1758 Balance: a credit, which he took in cash, sundries, and two dresses.
1759
1760 -37.10.9 = 0

ABRAML TOWADDE (124) (FINAL YEARS)
1740 -82.14.1 + 26.1.5 = -56.13.5
1741 -88.5.2 + 53.0.6 = -35.4.8
1742 -39.2.0 + 5.5.0 = -33.17.0
1742 -35.15.0 Balance discounted by Tristram Starbuck

J. TOWADDY (115) (FINAL YEARS)
1755 -135.18.8 + 182.0.1 = +46.1.5
1757 -ca. 143 + 46.1.5 = ca.-97

WOOSO (146)
1728 -48.2.8
1729 -74.1.3 + 26.13.2 = -47.8.6
1730 -87.4.11 + 40.14.10 = -46.10.1
1732 -53.12.11 + 24.17.0 = -28.15.11
1743 -34.6.6 + 19.12.8 = -14.13.10
